NEXUS AI

The AI Marketing Operating System

Campaign Strategy · AI Content & Video · Brand Memory · Multi-Platform Publishing

THE PROBLEM

SMEs Can't Scale Marketing. AI Tools Aren't Helping.

73%

of SME marketing time
wasted on manual
and repetitive tasks

6+

disconnected tools needed
to run a single
cross-platform campaign

Zero

tools that truly know
your brand across
every campaign

ChatGPT writes text. Buffer schedules posts. Jasper writes copy. None know your brand or work together.

THE SOLUTION

One AI Operating System for Your Entire Marketing Function

B

Brand Brain

Learns your brand DNA — voice, audience, competitors, positioning — powers every AI output

S

Campaign Strategy

Generates full marketing strategies: hooks, angles, content calendar, targeting, budget allocation

C

Content & Media

Scripts, captions, ad copy, images, videos, voiceovers — brand-aware and campaign-aligned

P

Auto-Publish

Schedules and publishes across TikTok, Instagram, LinkedIn, Facebook — fully automated

L

Learn & Iterate

Tracks performance, updates Brand Brain from wins, generates better campaigns automatically

Not a generator. Not a scheduler. A full marketing OS that learns, creates, and publishes autonomously.

4 Specialized AI Agents — Your Full Marketing Department

NEX

Content Director

Campaign wizard, AI video generation, brand-voice scripts, hooks, captions, content calendar, storyboards

VEX

Ad Specialist

Performance ad copy, A/B variants, headline testing, CTA optimization, paid media briefs

PULSE

Market Analyst

Market intelligence, competitor analysis, trend detection, strategic positioning recommendations

Sentinel

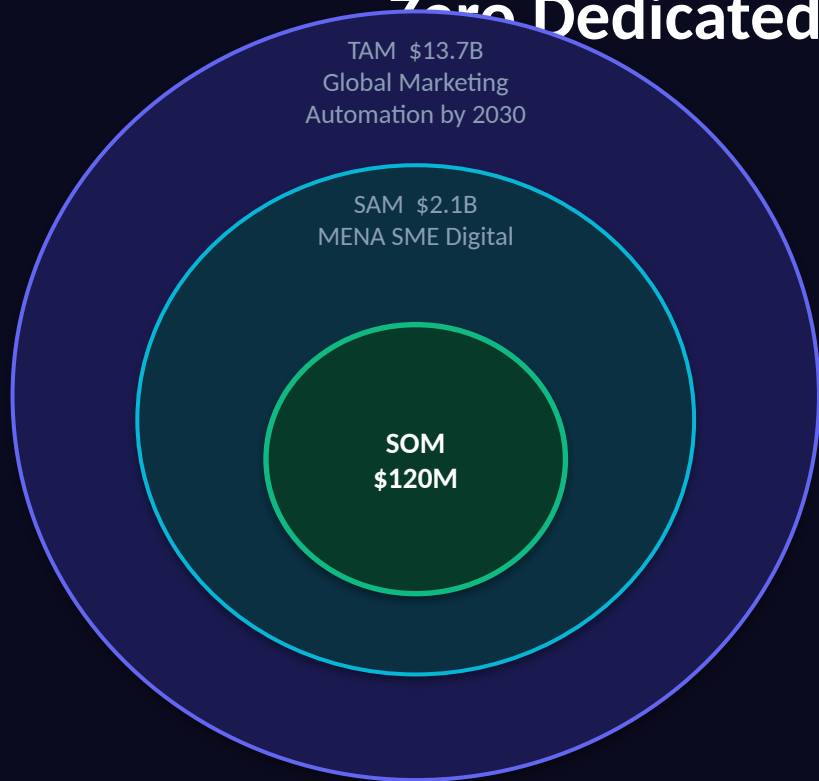

Brand Guardian

Pre-publish review, brand compliance, risk analysis, quality gate before every campaign goes live
